Subject: Fw: Re: Pavillion question

Andy Lensink gave me a call late last week. The legal folks seem to be confused regarding who (which lab) performed which analyses. I got the info from the Ada folks regarding Phases 3, 4 and 5 (see the info from 3 and 4 below). Do you have the same info from Phases 1 and 2? If you can get that to me, I can put it all together for Andy.

Thanks,
Deb

I'll take a cut at the Phase 3 and Phase 4 data sets.

Phase 3

Metals (major/trace) - Shaw

Dissolved gases - Shaw
Water Isotopes - Shaw
Anions, DIC, DOC - EPA/GWERD
VOCs - R8
SVOCs - R8
Methane Isotopes - Isotech
DIC Isotopes - Isotech

Phase 4

Metals (major/trace) - Shaw
Dissolved gases - Shaw
Water Isotopes - Shaw
VOCs and alcohols - Shaw
Low molecular weight acids - Shaw
Anions, DIC, DOC - EPA/GWERD
VOCs - R8
SVOCs - R8
Glycols - R3
Methane Isotopes - Isotech
DIC Isotopes - Isotech

In Phase 1 and 2, none of the analytical work was done here or by ORD contracts. The CLP labs, R8 lab, Zymex (isotope lab), and other labs were used.

I don't know which one of you can most easily answer this question....
I just got a call from one of the Region 8 lawyers that I know who is working on Pavillion. The legal folks are confused about which lab did what. Can someone give me a list/table of which lab did which set of analyses for each of the five Phases? Perhaps you guys don't have the info for Phase 1 and 2, maybe you do. But, anything you can give me would be helpful.
